AIR FREIGHT

You are urged to give serious consideration to having your strawberry plants from Chattanooga come by air freight. As plants come in a day by air they can be packed lighter, so the transportation cost should be little more by air than by rail. And coming so quickly they would arrive in prime condition. They will be shipped either by air freight or railway express, as you instruct.

BRENTWOOD BERRY GARDENS

HIGH GRADE PLANTS OF SUPERIOR VARIETIES

Strawberries Caneberries Rhubarb

140 S. CARMELINA AVE.
LOS ANGELES 24, CALIFORNIA

Nov. 15, 1946

To the Trade:

I returned Oct. 30 from a trip to Chattanooga, where I saw Mr. Mullins and his strawberry plantings. I was very favorably impressed with both Mr. Mullins and his partner, Mr. Leamon, who has charge of growing and packing. We went over the fields, digging plants here and there, and I found them to be the finest rooted plants I ever saw. Mr. Leamon knows how to grow plants and his method of packing is the best I have seen, protecting the roots to prevent drying out, but avoiding the heating and rotting of the crowns. Since I returned home Mr. Mullins wrote that Mr. Leamon said after meeting me that he was more determined than ever to put up my orders in the best possible shape.

These plants are grown on virgin soil and have been certified by the Tennessee Dept. of Agriculture to be free of disease and insect pests.

Mr. Mullins is County Agricultural Agent there and went into the growing of strawberry plants to clear up the plant situation in Tennessee and had the help of the Tennessee College of Agriculture in securing the best plant stock that it was possible to find.

East Tennessee is said by leading nurseries and plant authorities to produce the best strawberry plants in the nation, and the Mullins plants have been pronounced by a leading plant pathologist to be the best to be had. Mr. Mullins exercises great care to have his plants true to name and true to type, and carefully rogues his plants, watching his fields for off type and inferior plants which are taken out, and selecting extra choice plants that he finds, for propagation to improve the strains.

We have heard reports of hundreds of acres in Southern California that have been set to strawberry plants from Arkansas in the past two or three years that have been given the terms of wild, sterile, etc. It seems they resulted in great loss to the growers. But you can rest assured that you will get no wild or sterile plants from the Mullins Plant Farms. The Mullins plants will give your customers the greatest satisfaction.

Cordially yours for better plants,

W. A. LEE

What Growers and Nurseries say:

A Chula Vista grower: "We have about seven acres of Klondikes and they are the finest in this territory. All our plants came from you and they are very good and free from disease."

A grower near Sacramento: "I purchased 1000 Streamliner strawberry plants (from you) last year and am very well satisfied with them. They are the best all-round berries I ever raised and yield as good. They are very large in size. The color and flavor are excellent. They have good aroma and are as firm as the average strawberry." He ordered 5,000 more of this this season.

An Oakland nursery: "We were well pleased with stock purchased from you during the past two years, and would like to place our order for coming fall and winter with you."

An Auburn nursery: "We like your stock and service." They got Boysens and Youngs.

A Camarillo nursery: "We were well pleased with your handling of our order last year and we know that we can depend on you to give us the same quality of stock that we have received in past years."

CHOOSE THESE PLANTS AND BE SURE OF GETTING THE BEST.

SOME VARIETIES ARE IN VERY LIMITED SUPPLY. ORDER NOW, BEFORE THIS STOCK IS ALL BOOKED, AFTER WHICH PRICES WILL EITHER ADVANCE OR THERE WILL BE NO MORE OF THE VARIETY TO BE HAD. DESCRIPTIVE CATALOG, ILLUSTRATED IN COLOR AND BLACK AND WHITE, MAILED UPON REQUEST.

To Our Friends and Customers:

I returned Oct. 30 from a trip to Chetopa, Arizona where I met Mr. Mullins and his strawberry planters. I was very pleased to be pressed with both Mr. Mullins and his partner, Mr. Leamon, who has charge of growing and packing. We went over the plants, digging plants here and there, and I found them to be the best best rooted plants I ever saw. Mr. Leamon knows how to select plants and his method of packing is the best I have seen. He had the roots to prevent drying out, but wouldn't let the plants wither of the crowns. Since I returned home Mr. Mullins wrote that Mr. Leamon said after meeting me that he was more satisfied than ever to put up my orders in the best possible manner.

We have heard reports of hundreds of dollars in losses in California that have been set to strawberry plants from the past two or three years that have been given by the state with sterile, etc. It seems they resulted in great loss to the growers. But you can rest assured that you will get no such sterile plants from the Mullins Plant Farms. The Mullins plants will give you the greatest satisfaction.

Cordially yours for better plants

W. A. LEE
